Photophobia, or light sensitivity, is a condition associated with extreme sensitivity to lights. It can cause reactions like squinting, continual blinking, excessive tearing and even headache and nausea. Jen, a customer of ours, wrote, "As a young child I was called a bat because I couldn't handle light and was much happier in the dark or dusk."

### **Photophobia and Light Sensitivity Guide - Axon Optics**

If properly used, flash gives superb results for extreme macro, mainly because the duration of the light is so short that sharpness ceases to be an issue. Furthermore it is convenient - a portable, rechargeable light source, so it can be used both in the extreme macro studio photography and field macro.
