Australia In The Global Economy

Australia is a relatively open, trade-exposed economy. This means that changes in other countries' demand for our goods and services can have significant implications for our economy. For example, an increase in global demand for Australia's exports, if not matched by an increase in supply, will result in an increase in the price of those exports.

Australia and the Global Economy - The Terms of Trade Boom ...

Description. Australia in the Global Economy student book has been completely revised to reflect the latest developments in Australia and the global economy relevant to Year 12 students. Economy of Australia - Wikipedia

It is true Australia has considerable strengths even in a slowing global economy. But many of Australia's strengths are fragile, under strain, and contested. The policy requirements they impose are very far from the centre of Australia's political debate. Most of these strengths are in Australia's human capital, its people.
