VMware Organizationally Unique Identifier (OUI) allocation assigns MAC addresses based on the default VMware OUI 00:50:56 and the vCenter Server ID. Prefix-Based MAC Address Allocation You can use prefix-based allocation to specify an OUI other than the default one 00:50:56 by VMware, or to introduce Locally Administered MAC Addresses (LAA) for a larger address space.

### **Setting a Static MAC Address to a Virtual Machine - VMware**

The MAC address entered is not in the valid range. Valid values are between 00:50:56:00:00:00 and 00:50:56:3f:ff:ff. The reasons why VMware force manual MAC addresses into this scope are unclear to me (probably to prevent collisions), but regardless, it can be an issue. I needed to specify a particular MAC address in the 00:04 range.
